Anish Venkappa Vantagodi
Data Scientist Intern

Dedicated and Detail-oriented Data Scientist with excellent communication and interpersonal skills.Skilled with Python coding and Scripting . Highly skilled in data visualization, machine learning and natural processing.*Also well efficient in Django , Flask Framework and Deep Learning.*

SKILLS

Machine Learning

AWS   Deep Learning

Data Visualization

NLP   Python

MySql   Java

Tools - Jupyter Notebooks , PowerBi

Frameworks - Django, Flask, Streamlit

LANGUAGES

English
Full Professional Proficiency

Kannada
Native or Bilingual Proficiency

Hindi
Limited Working Proficiency

INTERESTS

Badminton

Artificial Intelligence

EDUCATION

Information Science and Techology , BE
Bangalore Institute Of Technology
12/2020 - Present   *CGPA- 9.26*

Second Year PRE - University Examination
Narayana PU College
05/2018 - 03/2020   *Percentage - 87.5%*

Secondary School Leaving Certificate
VSS International Public School
05/2013 - 03/2018   *Percentage - 89.6%*

WORK EXPERIENCE

Machine Learning Intern
Finplex Solutions
03/2023 - Present   *Bengaluru(Work from Home)*
Tasks
- Developed a chatbot for a bank and company's app, utilizing RASA for rule-based answers and integrating LangChain and LLM for generative-based responses.
- Fine-tuned the chatbot using company documents, enabling it to generate accurate answers and provide intelligent responses even when explicit information was not available.
- Implemented Flask as a backend to facilitate seamless communication, ensuring a user-friendly chatbot experience with robust error handling.

PERSONAL PROJECTS

Stress Anaylzer (02/2023)
- Analyzed and classified user problems using a dataset, leveraging Python (Pandas, TensorFlow, Keras) and deep learning algorithms (RNN) to achieve an accuracy of 94.6%.
- Utilized OpenAI API and LangChain to generate effective solutions based on the classified user problems, providing valuable assistance and support.
- Demonstrated proficiency in data analysis and deep learning to deliver accurate problem classification and personalized solutions.

Flight Price Prediction (11/2022)
- Developed a flight fare prediction system using Python (Pandas, Scikit-Learn) and ML algorithm (CAT Regressor) to accurately predict prices based on multiple factors.
- Created a user-friendly Flask application, allowing users to interact with the prediction model and deployed it on an AWS EC2 instance for seamless accessibility.
- Demonstrated expertise in data preprocessing, machine learning, web development, and cloud deployment to achieve a high prediction accuracy of 95.7%.

CERTIFICATES

The Full Stack Data Scientist BootCamp (02/2023)

Full stack web development and AI with Python (Django) (04/2022)

2022 Complete Python Bootcamp From Zero to Hero in Python (05/2021)
